Visa Security

Goal Leaders: U.S. Department of State Bureau of Consular Affairs (CA)
Assistant Secretary for Consular Affairs Carl Risch
Border Security
Overview

Goal Statement

• Impact Statement: Under Executive Order 13780 (Protecting the Nation From Foreign Terrorist Entry Into the United States), the interagency identified critical data points that should be collected from every visa applicant to enhance border security and visa security screening protocols.

• Agency Priority Goal Statement: By September 30, 2019, we will update the DS-160 and DS-260 nonimmigrant and immigrant visa application forms and add the newly-collected fields to our data sharing feeds for interagency partners.

Challenge

• The interagency, under direction of Executive Order 13780 (Protecting the Nation From Foreign Terrorist Entry Into the United States), is working to improve uniform screening and vetting standards for applicants for visa applicants.

• Collecting additional information from applicants is feasible once interagency consensus is reached. The application form and processing systems can then be updated to collect this data.

Opportunity

• Collecting additional information from visa applicants will enhance the immigrant and nonimmigrant visa security screening protocols by providing additional data points to screen against to prevent malaise actors from gaining entry to the United States.
In order to complete all critical fields for uniform screening and vetting, we must 1) reach agreement on the use and definition of additional information; 2) obtain OMB approval to revise our visa application forms; and 3) update our visa processing systems.

Early and effective external agency coordination is a key factor that could affect goal achievement. Gaining approval for the content of forms usually follows a standardized process controlled by the Office of Management and Budget (OMB) under the Paperwork Reduction Act (PRA). For this project, we have taken into consideration the standard process, timelines and milestones, and have engaged OMB on the importance of meeting our timeline for this project.

Consular Affairs must also update our public-facing electronic application forms, as well as our back-end databases to collect and store the new information. We anticipate that these changes will require modifications to the DS-160 and DS-260 online application forms, changes to the Consular Electronic Application Center (CEAC), the CEAC web report used by consular officers to review DS-160 and DS-260 information, and relevant databases.
Milestone for FY18 Q1: Definition and formulation of policy strategy and initial discussion with Interagency stakeholders to identify barriers and other issues.

The Visa Office met its FY18 Q1 milestone.

The Visa Office formulated a policy strategy to enhance nonimmigrant and immigrant visa security and vetting protocols and initiated initial discussions with interagency stakeholders to identify potential areas requiring additional data collection. The Visa Office elaborated a strategy for achieving the policy and technical goals, and identified potential roadblocks, including technical roadblocks that may result in project delays.
### Key Milestones

In order to complete all critical fields for uniform screening and vetting, we must 1) reach interagency agreement on the use and definition of required additional information; 2) obtain OMB approval to revise our visa application forms; and 3) update our visa processing systems.

- Recent Action: Federal Register notification in draft.

Data Accuracy and Reliability

Data regarding the formal approval of form updates will be collected from regular communications with OMB allowing us to move to the next stage of the process.

Definition of additional data will be collected from either formal reporting or meeting minutes.

System update data will be collected from meeting minutes, system status reports, and project charters.
Additional Information

**Contributing Programs**

Program Activities:
- Consular Affairs/Visa Office will coordinate the overall project and lead the OMB submission process;
- Consular Affairs/Consular Systems and Technology will update the online forms and any State Department data share connections that need adjustment;

Regulations:
- Office of the Legal Adviser will assist with the legal reviews needed for the OMB forms process and information decisions;
- Office of Management and Budget will manage the form approval process and provide a final approval to the form changes;

Stakeholder / Congressional Consultations:
- The Departments of Homeland Security, Justice and National Security Staff will contribute to the needed determinations for form enhancement.
