Agency Priority Goal Action Plan

Category Management

Goal Leaders:

Deb Broderick
Deputy Director, Management Bureau, Office of Acquisition and Assistance (M/OAA), USAID

Jennifer McIntyre
Deputy Assistant Secretary, Bureau of Administration, Office of Logistics Management (A/LM), Department of State
Overview

Goal Statement
- Increase consolidation of spending on common goods and services (not related to assistance) to maximize cost-efficiency and standardization. By September 30, 2019, meet or exceed Federal targets for Best In Class (BIC) contract awards.

Challenge
- USAID and Department of State (State) are working to use taxpayer dollars more efficiently and effectively in their operations and procurements. To do so, they are considering U.S. Government-wide contracts for goods and services to save money, avoid wasteful and redundant contracting actions, and free-up acquisition staff to accelerate the use of innovative procurements for high-priority mission work.

Opportunity
- By applying principles from Category-Management (CM) and the associated BIC solutions, USAID and State can purchase goods and services more like a single enterprise. Application of BIC solutions enables the Federal Government to eliminate redundancies by avoiding multiple contracts, increase efficiency by streamlining administration costs, and deliver more value and savings from the U.S. Government’s acquisition programs.
- The specific targets for Fiscal Year (FY) 2018 include the following:
  1. Increasing total spend under management (SUM) by 20 percent from FY 2016 baseline levels; and
  2. Increasing use of BIC solutions to 35 percent of addressable spend.
One of the overall goals of Category Management is to increase SUM. There are three tiers of solutions that fall under the broad umbrella of SUM: Tier 1, Tier 2, and BIC.

- The Office of Management and Budget (OMB) has designated BIC contracts as “preferred,” as they are Government-wide, and can provide the best savings and availability. These contracts have been pre-vetted and are mature and market-proven:
  - Tier 2 contracts are well-managed and have cross-agency collaboration occurring; and
  - Tier 1 contracts are also well-managed, and Agency-wide strategies exist.

The tier is determined by rating the following attributes:
- Leadership;
- Strategy;
- Data;
- Tools; and
- Metrics.

To accomplish the SUM and BIC goals, USAID and State plan to be actively engaged at the “Selection of Instrument” stage. They will also consider contract opportunities offered via Category-Management, especially BIC. If we opt for another contract method, we must justify and document our decision, and provide a plan to manage the contract we select.

Also, USAID and State plan to manage and attain these goals through a multi-phased process that focuses systematically to address the key attributes:
- Increase awareness;
- Provide education and training;
- Manage advocacy;
- Stakeholder-engagement;
- Apply and develop SUM principles;
- Measure and track results; and
- Evaluate and adapt to improve SUM.
USAID continues to make progress in reaching this APG’s goals and objectives. USAID measures its progress toward established SUM and BIC targets and against its FY 2016 baselines.

Progress to date for FY 2018: BIC spend through the third quarter is $56.3 million and total SUM is $1.6 billion. Current progress toward FY 2018 goals stands at 30 percent and 59 percent for BIC and SUM respectively. Based on historical data, USAID projects to have spent 56 percent of its spend by the end of the third quarter, and will spend the remaining 44 percent in the fourth quarter of FY 2018.
Several factors contribute toward the Agency’s trend to meet its FY 2018 CM goals: 1) increasing awareness of CM solutions and their capabilities through weekly notices and links to Acquisition Gateway websites offering training and in-depth details on various solutions; 2) assessing USAID’s Business Forecast to identify potential CM opportunities and reaching out to contracting officers (CO) to encourage use of CM solutions; and 3) increasing engagement across USAID Missions about CM.

USAID continues to accomplish CM initiatives by educating, training, and emphasizing the importance, capability, and benefits of CM to its contracting and Information Technology (IT) workforces. This includes GSA-led and USAID-specific training for USAID’s contracting and IT workforce (the largest groups leveraging CM and BIC solutions). The initiatives also include: a) encouraging the USAID Office of Small and Disadvantaged Business Utilization (OSDBU) and small-business implementing partners to participate in BIC and other similar contracts; and b) engaging the cognizant CO to consider adopting CM solutions and dedicating the month of June as “Category Management month”, when USAID focused on the importance and capabilities of CM.

A challenge for USAID is that it needs to manage the implementation of CM while balancing CM targets with the objectives and goals of USAID’s “Effective Partnering and Procurement Reform” (EPPR) effort. CM is designed to increase efficiency through the awarding of large contracts to a preset partner population, while USAID’s EPPR is designed to expand USAID awards to an increasing set of diverse local partners overseas.
Summary of Progress FY18 Q3 - State

- The Department of State is well-positioned to meet its FY 2018 BIC and SUM spend goals given current spend levels and pipeline awards.

- Progress for Q3 FY 2018: BIC spend through Q3 year to date is at $330M and SUM is at $942M. Progress toward FY 2018 goals currently stand at 53% and 64% for BIC and SUM respectively. About 42.2 percent of the Department’s annual contract spend* was awarded by the end of Q3.

*Estimated State Dept. annual contract spend = FY17 Q4 + FY18 Q1-Q3, data received from USASpending
Percentage is cumulative sum of Q1-Q3 spending divided by the estimated annual contract spend
Several factors are supporting State’s trend toward meeting its FY 2018 Category Management goals: 1) identifying and pursuing new CM initiatives through the Category Management program office located in the Bureau of Administration’s Office of Logistics Management with engagement from the Category Management Council (an internal State body comprised of senior officials across the Department) and 2) assessing DOS’s Business Forecast to identify potential CM opportunities and reaching out to programs and contracting officers (CO) to encourage use and/or development of CM solutions. Opportunities to pursue that are suggested by the Council have resulted in acquisition strategies relying on Best In Class solutions.

State continues to accomplish CM initiatives by educating, training, and emphasizing the importance, capability and benefits of CM to its contracting and IT workforces. This quarter, the Department hosted experts from GSA who provided an overview of the Acquisition Gateway and Best In Class contracts to the Acquisition Office’s senior management team (Division Directors and Branch Chiefs). As a result of this session, early next quarter the Department will hold a training session on CM with all of our Contracting Officers and Specialists.
USAID is proactive in monitoring and managing its CM effort. It has taken steps to increase CM awareness, training, planning, and execution. USAID will strengthen its acquisition processes to the extent possible to increase the use of CM when it provides an optimal solution in support of USAID’s mission, goals, and priorities.

To attain this APG, USAID has identified the following key milestones and associated due dates for development, implementation, monitoring, and reporting.

USAID is engaged in discussions with OMB to determine the appropriate denominator for measuring the Agency’s CM goal, given its unique international business model. The Agency seeks to avoid conflict between the APGs for CM and Effective Partnering and Procurement Reform.

Key Milestones - State

- State is proactive in its monitoring and managing of the CM effort. It has taken steps to increase awareness, training, planning and execution in the area of CM. State will strengthen its acquisition processes to the extent possible to increase support CM when and where it provides the most optimal solution in support of State’s mission, goals, and priorities.
- To address the attainment of this APG, the following key milestones and associated due dates have been identified for development, implementation, monitoring, and reporting.

Key Indicators

Key indicators will align to the two main metrics assessed related to CM:

- Outreach and training; (via USAID, State, General Services Administration [GSA] and OMB) across USAID and State, and CM-specific training to support awareness, application, and implementation (on-going, though started in May 2017).

- State and USAID will collect and report SUM on a monthly basis to monitor progress towards meeting the target goals. Analyses will include assessments of dollars obligated and total contracts awarded to arrive at percent of contract dollars managed.

- State and USAID will collect and report BIC on a monthly basis. Analyses will include assessments of dollars obligated and total contracts awarded to arrive at percent of contract dollars of total addressable spend.

- Each of the indicators (SUM and BIC) can be tracked monthly via MAX.gov.

- Indicators will provide a summary of how both USAID and State are doing compared to the baseline and targets.

- It is important to note that data reported via MAX.gov have an element of latency (by about a month) from when they are entered into the Federal Procurement Data System – Next Generation (FPDS-NG) and when the data are reflected in MAX.gov. State and USAID will address any data verification and data-quality issues at a minimum quarterly, and ideally, monthly.

- State will conduct final FY 2018 and FY 2019 BIC and SUM reviews after the annual certification of FPDS data.
Accuracy and Reliability, Data

- State and USAID report data specific to this APG to OMB via the Federal Procurement Data System – Next Generation (FPDS-NG), and OMB updates and reports on these data monthly.

- As FPDS-NG is the authoritative source of all Federal data, on Category-Management, the accuracy risks related to data are highly mitigated and appropriately managed.

- The analysis of data will include a review of what USAID and State systems report into FPDS-NG. Periodic assessment and data “cross-walks” will ensure the accuracy and valid recording of the data to ensure accurate and timely reporting.

- Data managers will make recommendations for adjustments based on the findings of these reviews.
Contributing Programs
Organizations:
  o State and USAID success is predicated upon all sub-organizations, Bureaus, and other entities contributing to assessing business needs and aligning planned activities with BIC.

Regulations and Policies:
  o OMB Memo 17-22 “Comprehensive Plan for Reforming the Federal Government and Reducing the Federal Civilian Workforce” is the guidance specific to describing and highlighting the need for Category-Management.

Other Federal Activities:
  o President’s Management Agenda

Stakeholder / Congressional Consultations
To the greatest extent possible, USAID and State CM teams will continue to work and coordinate with stakeholders and Congress, to ensure Category Management program and BIC solutions apply to meet the mission requirements of State and USAID.
